**Diane May RN, QTTT, RT**

is a true healer for our time, blending entrepreneurial skills with her passion for teaching to help others help themselves. The author of the popular *Therapeutic Touch Handbook* series, she brings 35 years of experience with TT and combines her extensive background in the field of human energy work, and management and administration to create highly successful workshops on three

continents, teaching over 78,000. Diane is the Past President of both TTNO and Therapeutic Touch International Association (TTIA).

**Workshop: "CRACKING THE CODE OF HEALING"**

The word “code” in computer science, often brings to mind something secret, mysterious, available only to a chosen few, hard to understand, having its own language and instructions, but no dictionary or translator. “Healing” can seem just as inscrutable. In healing, rather than the instructions being laid out beforehand, there is dynamism in creating the code (instructions) as a session progresses. This primarily experiential session is designed to help you identify your own Code of Healing. Explore your own obstacles/resistances and create a way through them. We will review the Theory of Healing and Shifts in Consciousness, then broaden perspectives by creating more familiarity with this information and move forward, incorporating the Inner Self in this process. Take a mental step back to look at the bigger picture and spend time being with those thoughts. Make these concepts your own and describe concepts in your own words while understanding their relation to the recently developed language, moving your practice to another level.
